GitHub: <https://github.com/Pasindu698>

PROFESSIONAL SUMMARY

Motivated Data Science undergraduate with skills in Python, SQL, and machine learning fundamentals. Experienced in building end-of-end projects including web systems, dashboards, and mobile applications. Quick learner with strong analytical, problem-solving, and teamwork abilities. Seeking a Data Science or Machine Learning internship to apply academic knowledge and gain real-world experience

EDUCATION

- **BSc (Hons) in Information Technology - Specializing in Data Science** **Oct 2023 – Present**
Sri Lanka Institute of Information Technology (SLIIT), Colombo, Sri Lanka, GPA 3.21
- **G.C.E. Advanced Level Examination - Physical Science Stream - 2021**
St. Anne's College, Kurunegala.

CORE COMPETENCIES & SKILLS

- **Data Analytics, Statistics & Machine Learning** - Data cleaning, EDA, statistical analysis, regression, classification, hypothesis testing, predictive analytics, data storytelling
- **Data Visualization & Business Intelligence** - Power BI, DAX, KPI reporting, dashboards, Excel visualization, OLAP, ETL, dimensional modelling, star schema
- **Programming & Data Analytics** – Python, R, SQL, JavaScript, TypeScript, C, C++, PHP
- **Database Management & Querying** - MySQL, Oracle SQL, MongoDB, Progress SQL
- **Web & Mobile Application Development** - React, Node.js, Express.js, HTML, CSS, Kotlin, Android, XML, Material Design
- **Development & Collaboration Tools** - Git, GitHub, Docker, VS Code

ACADEMIC & TECHNICAL PROJECTS

Sales Analysis Dashboard

Power BI, SQL, DAX, Excel

- Designed and implemented an end-to-end Retail Sales Data Warehouse using SQL Server with a Star Schema dimensional model.
- Developed SSIS ETL pipelines to extract, transform, and load data from SQL databases, CSV files, and TXT files.
- Implemented key data warehousing concepts including staging, surrogate keys, SCD Type 2, fact tables, dimension tables, and accumulating snapshot fact tables.
- Built Power BI dashboards to analyze sales trends, customer behavior, product performance, and KPI reporting using OLAP analysis and SSAS cubes.

National University of Smart Technologies Operations Hub

Spring Boot REST API, React, OAuth 2.0, MySQL, GitHub Actions

- Designed a production inspired full stack web system concept for facilities, asset bookings, maintenance tickets, notifications, and role-based access control.
- Defined REST API and React client workflows covering booking approvals, incident ticket handling, authentication, authorization, validation, and CI/CD requirements.

Positive Work Environment & Employee Morale Analysis

R, Statistical Testing, Regression, Naïve Bayes

- Conducted statistical analysis on the IBM HR Analytics dataset (1,470 employee records) to investigate the relationship between workplace environment factors and employee morale.
- Applied data preprocessing, ANOVA, correlation, regression, and Naïve Bayes classification to analyze employee satisfaction, overtime, work-life balance, and morale patterns.
- Developed predictive models and data-driven insights to evaluate how workplace support factors influence employee morale and retention.

TripNest - Tour Planner Web Application

MERN Stack - MongoDB, Express.js, React.js, Node.js

- Developed a tour planning system for browsing and booking travel packages, with admin features for smooth operational management.
- Implemented secure login, role based access, and connected frontend and backend workflows for smooth system functionality.

MediLux – E-Commerce Web Application

HTML, CSS, Java(Servlets & JSP), MySQL, JDBC, Apache Tomcat.

- Developed a Java web application implementing core e-commerce features including product catalog, shopping cart, user profiles, feedback system, and an admin dashboard for managing products and users.
- Implemented service requests, user management, and database operations using MySQL.

Fabfarm - Fashion E-Commerce Mobile App

Kotlin, Android, XML, Material Design

- Developed a fashion shopping mobile app with authentication, wishlist, and checkout features.
- Designed responsive UI screens and interactive user experiences.

MindfulDay – Personal Wellness Mobile Application

Kotlin, Android, Material Design, Alarm Manager

- Developed a personal wellness Android application using Kotlin with habit tracking, mood journaling, hydration reminders, and progress monitoring.
- Designed intuitive UI/UX with authentication, personalized tracking, and data persistence features.

CERTIFICATIONS

- MongoDB Data Modeling Path - Completed on 05 February 2026.
- AI/Machine Learning - Stage 1 | Sri Lanka Institute of Information Technology (SLIIT) | May 2026
- AI/Machine Learning - Stage 2 | Sri Lanka Institute of Information Technology (SLIIT) | May 2026
